

## Phone Wall Plate (Standard)

[View All Color-Rite Phone, Block & Combo Plates](#)

Our Color-Rite Wall Plates install right on the first try. They take the guesswork out of terminating connections, so even "trainees" can produce good results with minimal instruction.

The standard and mid-size smooth wall plates feature:

- 4 conductor screw terminal wiring that color-matches Cat 3 and Cat 5 cabling
- 4 conductor terminal screws that color-match the wiring of station wire (ideal for retrofit work)
- Color-Rite Wall Plates install in standard NEMA single-gang boxes. The special design eliminates incorrect wiring to the terminal and costly project callbacks.
