

## WHY NOT ENJOY THE FEEL OF YOUR FLOOR!

Do you ever notice that if your feet feel warm, the rest of your body is comfortable? Warm Tiles creates a floor that is comforting, providing an even temperature while hidden under your floor finish. Warm Tiles radiates this warmth through a network of low profile warming cables, hardware and electrical controls for an economical and long lasting warming system.

Your Warm Tiles Thermostat will regulate only enough electricity to heat your floor to the desired temperature. When the floor reaches your preset temperature, the electricity will cycle off. Since the electricity is generating warmth about one-third of the time, the cost savings are significant. On average, the operating cost is 1¢ per heated square foot per day, regardless of the size of your installation.

Warm Tiles Thermostats provide consistent comfort and control. Our floor sensor is embedded in the mortar just below your tiles, which monitors the actual floor temperature to provide you with accurate comfort levels.

Each model features comfort level programming options as well as a simple off position selector switch. You may also choose the pre-programmed setback mode to reduce energy usage by over 50%. Optional decorator doors are available for all Warm Tiles Thermostats.

The Warm Tiles Systems can be installed by professional electricians, tile installers, general building contractors or skilled Do-It-Yourselfers who have adequate knowledge of flooring and electrical wiring. All installations must be in accordance with all applicable national (NEC and CEC) and local electrical and building codes, regulations and inspection procedures. Electrical inspection may be required during and/or after system installation. Check with your local electrical inspection department before beginning installation.

## ADVANTAGES OF THE GTS 120V AND 240V PROGRAMMABLE THERMOSTAT:

Warm Tiles GTS Thermostats offer comfort level programming options as well as a simple on/off position selector switch.

- Programmed for easy setup
- Manual operation setting
- Programmable 7 day or 5/2 day options
