Renovate the right way with Eaton's Retrofit Interior Kit

The Loadcenter and Panelboard upgrade problem now has a solution.

Many older facilities have a loadcenter or a panelboard flush mounted in plaster, concrete, or even block walls. Asbestos also poses an upgrade obstacle for many of these facilities.

Replacing an entire panel, which usually entails significant wall repair, dramatically increases the time and cost involved.

Eaton's Retrofit Interior Kit allows you to upgrade your current electrical panels without having to remove the existing box. Its innovative, patented adjustable interior makes installation simple.

Whether upgrading a commercial complex or simply renovating a single-family home, Eaton's Retrofit Interior Kit provides a professional upgrade solution at a fraction of the cost of a complete panel replacement project.

The minimum warranty for Residential loadcenters and breakers shall be as follows:

- Lifetime warranty on all CH branch breakers and loadcenters
- 10 year warranty on all BR branch breakers and loadcenters
- Refer to Eaton for complete warranty details

Retrofit Interior Kit

The Lincoln Flex Center

A prominent northeastern university is one of Eaton's Retrofit Interior great success stories.

Eaton's Retrofit Interior Kit Advantage

Upgrading existing electrical infrastructure is simple

- Replaces vintage brands that have hard to find, expensive replacement breakers
- Allows safety upgrade to Arc Fault & Ground Fault breakers
- Maximizes number of circuits available with compact design
- Meets 2008 NEC® wire bending requirements
- Eco-friendly in asbestos-filled environments
- Exclusive Patented design

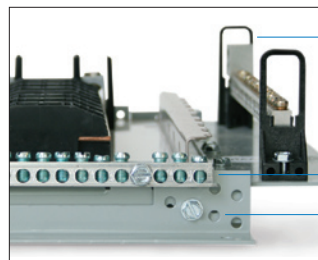

Save time & money throughout the installation

- Uses existing panel box & wires
- Eliminates expensive drywall / paint repair
- Saves 2-3 hours compared to a complete panel changeout – get off the job faster!
- Eliminates precise measurements with field-adjustable kit

Uses existing panel box & wires

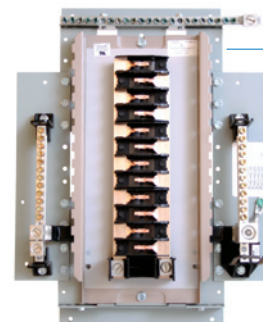

Each Kit Includes:

Adjustable Interior

Factory installed ground & neutral bars positioned to accept existing wires

Field adjustable depth matches existing panel box

Adjustable height enables optional placement of the interior

Field bondable for Service Entrance applications

Collar & Assembly with Trim

Standard Trim matches new interior

New Circuit Directory for updated labeling

Oversized Collar eliminates expensive wall/paint repair
