

GenPad™ by DIVERSITECH®

17kW

GENERAC®
Guardian Series

A Solid Foundation for You and Your Customers

The new GenPad™ series from DiversiTech® is the answer for dealers who need a professional looking pad that will provide a lifetime base for their Generac® Residential Standby Generator installations.

Each GenPad is made from a composite of high strength fibers and cement and is warranted for the life of the generator. These pads provide a sturdy, permanent base for the generator that won't shift, crack or degrade over time. Give your customers even more peace of mind with their generator purchase when you add the reliable GenPad.

GenPads are much lighter weight than a poured concrete pad and take less time and effort to install. GenPads are available for all Generac Guardian Series air-cooled generators. GenPads were specifically designed to meet the engineering specifications of Generac units. All GenPads include these features:

- **Extremely Impact and Breakage Resistant**
- **Fiber reinforced concrete that is further reinforced with rebar**
- **Flat bottom to facilitate easy leveling of the pad and generator**
- **Virtually eliminates sinking of the unit into the ground**
- **Easy to install**
- **½ the weight of poured concrete**
- **Meets national gas code NFPA 37**

Two models to meet any need

GenPad
Designed for residential installation.

**Patents Pending*

GenPad Hurricane
Thicker, heavier 4" pad designed to meet wind load requirements in hurricane prone areas.

GenPad Program Enhancement

2, 5, 10 and truck load quantities available

*2 Pad Pallet available for a limited time

We are pleased to announce that GenPads are now available in pallet quantities of 2, 5, 10, 100, 140 and 150!

GenPads are the answer for dealers who need a professional looking pad that will provide a lifetime base for their Generac Residential Standby Generator installations. GenPads are offered in two sizes, a standard 3" pad and a 4" hurricane pad that is ideal for high wind zone areas.

- Pallets of 10 can be mixed between the 2 part numbers (Example: Qty 8-OJ5339 and Qty 2-OJ5340).
- Pallets greater than 100 can be mixed between the 2 part numbers in quantities of 10 (Example: Qty 80-OJ5339 and Qty 20-OJ5340). Due to weight limitations all mix & match orders for quantities greater than 100 will be reviewed by Generac prior to shipment
- Prices are at NET pricing

FAQ:

Q: How do I order these pads?

A: GenPads are now available direct from Generac. They can be ordered by email at AfterSales@generac.com or by fax at 262-472-6515. Use the Generac part numbers and information in the chart when ordering.

Q: Is the GenPad approved by Generac for use with its generators?

A: The GenPad has been tested and approved by Generac as an alternate installation method to poured concrete pads and direct placement. The GenPad is designed to fit the mounting bolt pattern of all Guardian Series 8-20 kW home standby generators.

Q: Why would I want to install a GenPad under a Generac Guardian Series unit?

A: The GenPad provides a solid, sturdy foundation for the Generac Guardian Series generator and eliminates the risk of uneven mounting surfaces. Many local area codes may also require a concrete base for the generator. The GenPad also provides extra height off the ground for the generator.

Q: Can I install the Guardian Series on the GenPad without removing the black composite mounting pad?

A: Yes, by leaving the black composite mounting pad attached to the generator with the back two bolts and by removing the front two bolts. Place the generator, with the black composite mounting pad in place, on top of the already placed and leveled GenPad. Align the bolt holes of the Generac Guardian Series generator with the inserts in the GenPad and attach together by using 3" long 3/8" bolts.

Q: Why should I sell my customers a GenPad?

A: The GenPad provides a sturdy base for the Generac generator and helps protect it and keep it level to maximize its performance and life. The GenPad is faster and easier to install than pouring a concrete pad and makes an excellent accessory add-on when selling a new generator.

Q: Where is the GenPad Hurricane used?

A: The GenPad Hurricane (#OJ5340/#OK0034) is a heavier, 4" thick pad that is ideal for high wind zone areas including much of the Gulf coast region and counties in south Florida. This heavier pad provides an even sturdier base to help protect Generac generators in these areas that may be affected by high winds. To view the wind load tables please visit: genpads.com/resources.html

Other info:

Warranted for the life of the generator (through DiversiTech). 25% recycled material. Rebar reinforced.

3 Inch Pad Information

Generac Part Number	Description	Weight per Pad	Pads per Order
OK4678	54" X 31" x 3"	189	2
OK0033	54" X 31" x 3"	189	5
OJ5339	54" X 31" x 3"	189	10
OJ5339	54" X 31" x 3"	189	100
OJ5339	54" X 31" x 3"	189	150

4 Inch Pad Information

Generac Part Number	Description	Weight per Pad	Pads per Order
OK4679	54" x 31" x 4"	275	2
OK0034	54" x 31" x 4"	275	5
OJ5340	54" x 31" x 4"	275	10
OJ5340	54" x 31" x 4"	275	100
OJ5340	54" x 31" x 4"	275	140

Optional Delivery Charges (*flat rate, not each*):

Residential Delivery: \$75.00; Lift Gate: \$75.00; Pallet Jack: \$15.00
ONLY ONE 2 PAD PALLET PER ORDER

GenPad™ Features & Benefits

GenPad Features	Benefit to Dealer	Benefit to Installer	Real Value
Lightweight	Easy to Stock	Easy to Install, saves time	Saves Cost
Precision Produced	Fewer callbacks	Easy to Install	Saves Cost
