

Nylon Angle Adapter

Features - Specifications

ANGLE ADAPTERS

- Nylon angle adapters convert 20 and 30 ampere nylon locking plugs and connectors into space-saving angle devices. The adapter can be used with 82 different 20 amp and 30 amp NEMA/ANSI devices, providing the widest choice available in the industry.

- Adapters permit wire to exit parallel to the receptacle, eliminating space needed for wire to bend. Allows machinery to be placed closer to the wall and prevents wire damage.
- Angle adapter adjusts to permit proper positioning of plug and connector
