

Cablofil® Cable Management

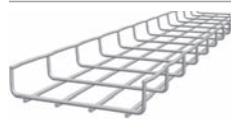

Easy-To-Use Wire Trays, Connectors & Supports

Cablofil Cable Tray

Cablofil is a global leader in innovative cable management, with over 93,000 miles of wire mesh cable tray installed worldwide. The Cablofil wire mesh tray design adapts easily to any installation on-site with simple tools. Cablofil wire mesh tray design features Safe-T-Edge, a unique process that T-welds the lateral wires to the top wire to create a smooth edge that minimizes the risk of frayed cables and protects installers from sharp wire ends. Our patented FAS support system utilizes a locking tab that secures the tray and requires no screws, bolts or special tools for installation.

6" depths, in widths ranging from 2" to 24" and standard 10' lengths. Available finishes are Electro Zinc (EZ), Hot-Dipped Galvanized (GC), 316L Stainless Steel (IN) and durable powder coat colors: Black (BL) or Custom Painted Color (PE).
