

Weatherproof Boxes, Covers, and Lighting

■ We've got you covered — with a complete line of outdoor electrical solutions

Homeowners want all the convenience of outdoor electrical receptacles and lighting. We've made it easy for you to meet their demand — with a weatherproof line that covers everything you have asked for. Including a complete line of easy-to-install cast metal boxes and covers, thermoplastic covers, and outdoor lighting, available in the most popular colors. And our unique While-in-Use Covers with advantages nobody else rivals.

■ We've got you covered — on Code compliance

The 2002 National Electric Code® Section 406.8(B)(1) requires that all 15 and 20 Amp, 125 and 250 Volt outdoor receptacles in wet locations must have a cover that is weatherproof — even while a plug is inserted into the receptacle.

Our While-in-Use Covers provide the simplest solution:

- No need to remove the wiring device — just loosen the screws and install using our keyed mounting holes.
- Our exclusive, diagonal-hinge design allows covers to be installed either vertically or horizontally.
- Available in 1 gang, 2 gang, 1 gang shallow, and 1 gang deep configurations with snap-in device plates for all common device openings.

So only a few catalog numbers cover most applications which means less to stock!

■ We've got you covered — with callback-beating quality and dependable performance

- Corrosion-resistant, stainless steel mounting screws and springs.
- Precision die-casting with a super-rugged, powder-coat finish for cast metal boxes and covers.
- Impact-resistant, polycarbonate construction for covers.
- Extra-sturdy hinges.

■ We've got you covered — on ease of installation

Contractors choose P&S products because they save time and boost productivity. With features like:

- Pre-applied gaskets on our While-In-Use Covers that can't get lost or damaged on site.
- Cast metal boxes with universal mounting holes that accept both four-screw and device-mount covers.

Weatherproof Boxes, Covers, and Lighting

P&S Cut Case packaging makes it easier to manage and display your inventory. The 1-piece, tear-off design makes restocking a breeze. Shrink-wrapped product stacks neatly inside 4" or 6" wide cartons, so you can tell at a glance when it's time to reorder. The colored label and product line art also make it easier to identify what's in each box.

DEVICE COVERS*

Catalog #	Colors	Description

COLOR CODE

BK = Black
BR = Bronze
C = Clear
G = Gray
GR = Green
W = White

*NOTE: If product is available in multiple colors, **replace** parentheses with color code. ie: **CA26-(V)** becomes **CA26-WV**

NOTE: Base number indicates product color is gray. If you prefer alternate color, add the appropriate color code to end of catalog number. ie: **WPRB25 = Gray
WPRB25-BR = Bronze
WPRB25-W = White
