Maestro Wireless® Dimmers and Switches

The Maestro Wireless® solution incorporates Maestro Wireless® load controls, wireless sensors, and wireless remote controls, which provide a system that delivers energy savings, convenience, and ease of installation.

Maestro Wireless® dimmers and switches use Lutron® patented Clear Connect® RF Technology, which enables wireless communication with Radio Powr Savr® sensors and Pico® wireless controls for light control and general switched loads.

Features
- The Maestro Wireless® solution provides dimming/switching of multiple load types, occupancy/vacancy sensing, daylight harvesting, and high-end trim.
- Lutron® patented Clear Connect® RF Technology works through walls and floors.
- Incorporates advanced features such as fade ON/fade OFF, high-end trim, and rapid full-ON.
- Controls include Front Accessible Service Switch (FASS™) for safe lamp replacement.
- Two-wire dimmers and switches available for retrofit applications.
- Power failure memory: If power is interrupted, the control will return to its previously set level prior to interruption.
Maestro Wireless® Dimmers

Models Available

Dimmers

CFL/LED/Halogen/Incandescent/Magnetic Low-Voltage

MRF2-6CL-XX 150 W CFL/LED Dimmer; 600 W/600 VA Incandescent/MLV Dimmer 120 V～
MRF2-6MLV-XX 600 W/600 VA Incandescent/MLV Dimmer 120 V～
MRF2-6ND-120-XX* 600 W/600 VA Spec-Grade Neutral wire Dimmer 120 V～
MRF2-10D-120-XX 1000 W/1000 VA Spec-Grade Dimmer 120 V～

3-Wire Fluorescent

MRF2-F6AN-DV-XX* 6 A 3-wire Fluorescent Spec-Grade Neutral-Wire Dimmer 120–277 V～

Electronic Low-Voltage Dimmer

MRF2-6ELV-120-XX* 600 W ELV Dimmer 120 V～

* Neutral wire required

Companion Dimmers

Claro® Gloss Finishes

MA-R-XX Companion Dimmer 120 V～

MSC-AD-277-XX Companion Dimmer 277 V～

"XX" in the model number represents color/finish code.
Ganging and Derating
When combining controls in the same wallbox, derating is required (see Load Type and Capacity tables). Only MRF2-8ANS controls have fins that need to be removed for multigang installations. No other controls have fins, but they must still be derated in multigang installations.

</tbody>
</table>

Note: do not mix ELV and MLV load types on a single control.

1 Dimmer Load Type:
- MRF2-6ND-120, MRF2-6MLV, and MRF2-10D-120 are designed for use with permanently-installed incandescent, magnetic low-voltage, or tungsten halogen only.
- MRF2-6ELV is designed for use with permanently-installed electronic low-voltage only. Do not install dimmers to control receptacles or motor-operated appliances.
- MRF2-F6AN-DV is designed for use with permanently installed 3-wire line voltage control fluorescent ballasts or LED drivers only (Hi-lume®, Hi-lume Compact SE®, Eco-10®, and EcoSystem®).
- MRF2-6CL is designed for use with permanently-installed incandescent, CFL, LED, or tungsten halogen only.

2 Low-Voltage Applications:
- Use MRF2-6ND-120, MRF2-6MLV, and MRF2-10D-120 with magnetic (core and coil) low-voltage transformers only. Not for use with electronic (solid-state) low-voltage transformers.
- Use MRF2-6ELV with electronic (solid-state) low-voltage transformers only. Operation of a low-voltage circuit with lamps inoperative or removed may result in transformer overheating and premature failure. Lutron strongly recommends the following:
  - Do not operate low-voltage circuits without operative lamps in place.
  - Replace burned-out lamps as quickly as possible.
  - Use transformers that incorporate thermal protection or fused transformer primary windings to prevent transformer failure due to overcurrent.

3 Can control the following power booster/load interface: Hi-Power 2•4•6™ Boosters (HP-2, HP-4, HP-6) for control of most popular lighting sources including Lutron® 3-wire line-voltage control fluorescent dimming ballasts (Hi-lume®, Hi-lume Compact SE®, Eco-10®, and EcoSystem®).

4 Can control the following power boosters/load interfaces: Phase-adaptive Power Modules (PHPM-WBX-DV-WH), Tu-Wire® Fluorescent Power Modules (PHPM-PA-DV-WH), and 0~10 V (GRX-TVI).
**Dimmer Load Type and Capacity** (continued)

*Mixing Lamp Types*
Mixing lamp types (using a combination of CFL/LED, and Incandescent/Halogen bulbs) and ganging with other dimmers or electronic switches may reduce maximum wattage, as shown. Example: If fins from one side of dimmer are removed and you have two 24 W bulbs installed (total CFL Wattage = 48 W), you may add up to 300 W of incandescent or halogen lighting.

<table>

---

¹ Switch Load Type:
- MRF2-8ANS-120 is designed for use with permanently-installed lighting loads and with fan motor loads up to 1/4 HP (5.8 A).
- MRF2-6ANS is designed for use with permanently-installed lighting loads and with fan motor loads up to 1/10 HP (3 A).
- MRF2-8S-DV is designed for use with permanently-installed lighting loads and with fan motor loads up to 1/10 HP (3 A, 120 V~ only).

² For loads larger than 8 A (120 V~), the MRF2-8ANS-120 switch can be used with the PHPM-SW-DV-WH power booster.

³ The LUT-MLC ensures proper function with certain fluorescent, CFL, and LED load types.

⁴ Maximum load for double-gang application is 8 A. Triple-gang application derates maximum load to 7 A.
Specifications

Regulatory Approvals
• UL Listed.
• cUL Listed (MRF2-6CL only).
• CSA Certified (except for MRF2-6CL).
• FCC Approved. Complies with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules.
• Industry Canada Certified.

Power
Operating voltage:
• 120 V~ 50/60 Hz (all models)
• 277 V~ 50/60 Hz (MRF2-8S-DV, MRF2-F6AN-DV)

Key Design Features

Dimmers
• On a single-tap, lights fade UP or DOWN.
• On a double-tap, lights go to full ON.
• When ON, press and hold to engage 20-second fade to OFF.
• Light levels can be fine-tuned by pressing and holding the dimming rocker until the desired light level is reached.
• Two-wire dimmers available.

Switches
• On a single-tap, lights turn ON or OFF.
• Two-wire switches available.

All RF Local Controls
• Tested to withstand electrostatic discharge without damage or memory loss, in accordance with IEC 61000-4-2.
• Tested to withstand surge voltages without damage or loss of operation, in accordance with IEEE C62.41-1991 Recommended Practice on Surge Voltages in Low-Voltage AC Power Circuits.
• Controls always operate locally and do not require system control.
• Power failure memory: should power be interrupted, the control will return to its previously-set level prior to the interruption when power is restored.
• Uses conventional 3-way and 4-way wiring.
• Multiple location control from Dimmer/Switch and up to nine Companion Dimmers/Switches.

System Communications and Capacity
• Maestro Wireless® controls communicate with the Pico® wireless controls and Radio Power Savr™ sensors through radio frequency (RF).
• Maestro Wireless® local controls must be located within 60 ft (18 m) line-of-sight or 30 ft (9 m) through walls, of Radio Power Savr™ sensors.
• Maestro Wireless® local controls must be located within 100 ft (30 m) line-of-sight or 30 ft (9 m) through walls, of a Pico® wireless control.
• Up to ten Maestro Wireless® controls can be configured to work together.

Environment
• Ambient operating temperature: 32 °F to 104 °F (0 °C to 40 °C), 0%–90% humidity, non-condensing. Indoor use only.
Dimensions
All dimensions are shown as: in (mm)

Front View

Side View

Mounting
Operation

**Dimmer**

- **Status LEDs:** Indicate light level; glow softly as night light when light is OFF
- **Dimming Rocker:** Press to brighten, Press to dim
- **Tapswitch:** Tap ON / OFF; Double-tap: lights go to full ON

**Switch**

- **Status LED:** Indicates load status; glows softly as night light when light is OFF
- **Tapswitch:** Tap ON/OFF

---

**FASS™ Front Accessible Service Switch**

**Important Notice:** To service load, remove power by pulling the FASS™ switch out completely on either the Dimmer/Switch or Companion Dimmer/Switch. After servicing load, push the FASS™ switch back in fully to restore power to the control.
Wiring Diagrams

Single-Location Dimmer Installation without Neutral
MRF2-6CL, -6MLV, -10D-120

1. When using controls in single location installations, tighten the blue terminal without any wires attached. Do not connect the blue terminal to any other wiring or to ground.

2. Up to nine Maestro® Companion Dimmers may be connected to the Maestro Wireless® Dimmer. Total blue terminal wire length may be up to 250 ft (76 m).
When using controls in single location installations, tighten the blue terminal without any wires attached. Do not connect the blue terminal to any other wiring or to ground.

Up to nine Maestro® Companion Dimmers / Switches may be connected to the Maestro Wireless® Dimmer / Switch. Total blue terminal wire length may be up to 250 ft (76 m).

Neutral-wire Dimmers / Switches must be connected on the Load side of a multi-location installation.
Wiring Diagrams (continued)

Single-Location Switch Installation with LUT-MLC
MRF2-8S-DV

1. A LUT-MLC ensures proper function when fluorescent, CFL, or LED loads are used. Install the LUT-MLC inside a load fixture or in a separate J-box within the circuit.

2. When using controls in single-location installations, tighten the blue terminal without any wires attached. Do not connect the blue terminal to any other wiring or to ground.

3. Up to nine Maestro® Companion Switches may be connected to the Maestro Wireless® Switch. Total blue terminal wire length may be up to 250 ft (76 m).

Multi-Location Switch Installation with LUT-MLC
MRF2-8S-DV with MA-AS / MA-AS-277 or MSC-AS / MSC-AS-277

1. A LUT-MLC ensures proper function when fluorescent, CFL, or LED loads are used. Install the LUT-MLC inside a load fixture or in a separate J-box within the circuit.

2. When using controls in single-location installations, tighten the blue terminal without any wires attached. Do not connect the blue terminal to any other wiring or to ground.

3. Up to nine Maestro® Companion Switches may be connected to the Maestro Wireless® Switch. Total blue terminal wire length may be up to 250 ft (76 m).

Wiring Diagrams (continued)

Single-Location Fluorescent Dimmer Installation with Neutral MRF2-F6AN-DV

When using controls in single location installations, tighten the blue terminal. Do not connect the blue terminal to any other wiring or to ground.

Up to nine Maestro® Companion Dimmers may be connected to the Maestro Wireless® Dimmer. Total blue terminal wire length may be up to 250 ft (76 m).

Neutral-wire Dimmers must be connected on the Load side of a multi-location installation.

Requires MA-R / MA-R-277 or MSC-AD / MSC-AD-277 for 277 V~ applications.

Multi-Location Fluorescent Dimmer Installation with Neutral²,³ MRF2-F6AN-DV with MA-R / MA-R-277 or MSC-AD / MSC-AD-277

Neutral-wire Dimmers must be connected on the Load side of a multi-location installation.

Requires MA-R / MA-R-277 or MSC-AD / MSC-AD-277 for 277 V~ applications.

---

¹ When using controls in single location installations, tighten the blue terminal. Do not connect the blue terminal to any other wiring or to ground.

² Up to nine Maestro® Companion Dimmers may be connected to the Maestro Wireless® Dimmer. Total blue terminal wire length may be up to 250 ft (76 m).

³ Neutral-wire Dimmers must be connected on the Load side of a multi-location installation.

⁴ Requires MA-R / MSC-AD for 120 V~ applications, and MA-R-277 / MSC-AD-277 for 277 V~ applications.
