The M12™ Cordless Red Heated Jacket utilizes multi layered fabric technology to actively warm the body and stimulate blood circulation. The jacket provides unmatched warmth and performance with a fleece inner liner and durable carbon fiber heating elements not only in the chest and upper back, but now in lower pockets that are controlled independent of the core heating elements to provide increased warmth to the hands. The 2340/2341 M12™ Heated Jacket features three heat settings, for varying heat needs and is water and wind resistant for a variety of cold job site conditions or outdoor sports and activities.
