BUILT FOR EXTREME CONDITIONS

The compact N-Tron® 105TX-SL unmanaged Industrial Ethernet switch is ideal for industrial applications that demand dependable performance under harsh conditions. The ultra-slim five-port device offers exceptional reliability and performance for a range of mission-critical applications including data acquisition, Ethernet I/O and process control.

Delivered in a rugged industrial metal enclosure, the 105TX-SL provides five high-performance 10/100BaseTX copper ports with full wire speed communications—up to 1.0 Gb/s throughput—for robust network support. The unit boasts exceptional MTBF and extended tolerances to shock, vibration, temperature fluctuations and noise—common elements in factory floor control networks, utilities, wastewater treatment, wind turbines, rail car, intelligent traffic control and transportation applications.

EASY TO USE

The ultra-slim 105TX-SL is an excellent plug & play solution. For convenience, the unit configures itself on the network at connection and features auto sensing 10/100BaseTX ports that intuitively negotiate speed and data flow. Automatic features enable instant recognition of network changes and/or updates, adjusting communications on the fly.

Excellent Network Support

Compact and powerful, the 105TX-SL is designed with advanced communication processing, store-and-forward technology and high-speed processing that allows full wire speed on all ports simultaneously. The unit is optimized for increased determinism and eliminates virtually all network collisions. The five high-performance network ports instantly recognize and resolve 10/100BaseTX, MDIX and duplex conflicts. For added convenience, LEDs are provided to display link status and activity for each port.
