INNOVATIVE TECHNOLOGY

TAKE HOME THEATER TO ANOTHER LEVEL

With the right setup, HDMI can make a significant difference in a home theater system. HDMI can cut down on the number of cables required to connect.

HDMI cable connectors can be used for any uncompressed TV or PC video format, including standard, enhanced, high definition and 3D video signals. The current standard can carry 1080p high-definition signals, and it supports eight channels of uncompressed audio, enough for a 7.1 surround sound system and an Ethernet data connection.

HDMI Repeater
(AC2100)

SYSTEM FEATURES

- HDMI supports up to 120Hz refresh rate, deep color and advanced 10.2 Gbps rate
- Combines video and multi-channel audio into a single cable
- Provides the best quality for video since there are no analog to digital conversions required
- Transmits all ATSC HDTV standards
- Supports 8-channel, 192kHz, uncompressed digital audio, compressed audio and 3D TV transmission standards
- Includes bandwidth to spare to accommodate future enhancements and requirements

WIRING DIAGRAM

CONCEAL CABLING BEHIND THE WALL

Easily conceal any type of cable with the Basic In-Wall HDMI Signal Distribution Kit. Using the included Cable Access Strap makes pulling the cables behind the walls a breeze and eases the distribution of signals from equipment to the TV.
