The above P/N's have had their performance validated by Legrand; however, Legrand's Intuity home automation should work with all Kwikset, Yale and Schlage z-wave locks

***Intuity supports the basic functions of all Kwikset, Yale, and Schlage Z-Wave Certified Locks (except for first generation Schlage**) as follows:**

- Basic functions and notifications supported with any Z-Wave certified lockset
- Locking and unlocking through the Intuity system.
 - Receive and process notifications generated by the locksets upon manual locking and unlocking by keypad or key.
 - Receive and process reports generated by the locksets for battery life
- Activities can be triggered from the actions noted above when:
- Lockset is locked by keypad or key send notification and email to system users.
 - Lockset reports low battery send notification and email to users.
 - Lockset is unlocked during predetermined times turn a light ON.

NOTE: Other proprietary features and functions of these brands are not supported at this time.
