

7000 Series 12" Amplified Sub-Woofer

HT7124

The 7000 12" Sub-Woofer is optimized for home theater and distributed audio systems. It features a 12" glass fiber cone in a sealed enclosure with a 200 RMS power amplifier. With both line and high-level (speaker level) inputs and high-level outputs (post crossover), it also includes a variable crossover from 50Hz to 200Hz, phase reversal switch, volume control and power switch. Frequency response is 35Hz to 200Hz. Single speaker.

features & benefits

- High-power handling and adjustment capabilities ensure ultimate in home sound
- Top-of-the-line speaker series from On-Q designed to maximize the best in distributed audio and home theater installations
- Features glass fiber woofers that provide superior power capacity for a stronger, deeper sound

specifications
