

PulLee

Part# 41100

This slim, but strong, steel roller fits in your box for smooth and controlled wire pulling.

It effortlessly guides wire and cable into the feeding end of the job at the correct angle, eliminating the need for a second person to manually guide the feeding end.

Features

- Spring loaded tips keep it locked in place
- Stainless steel design for maximum strength

Mfg Note

Note for Canadians: This product is available in Canada, but we do not recommend it because most electrical boxes in Canada do not have holes directly across from each other. Please consider the Wire Vortex (part# 40001) if you live in Canada.
