

The Pipe Viper™

Pipe Viper

[Click Here to View Multiple Part#](#)

You can COLD bend rigid PVC pipe without your pipe collapsing or fracturing.

Faster and easier than cutting and gluing factory fittings. NO HEAT REQUIRED!

Features

- Bends PVC pipe across your knee
- No heat guns
- No heat blankets
- Fewer PVC fittings

Mfg Note

Just insert the spring into the pipe and bend across your knee.

Note: Pipe should be 50 degrees Fahrenheit or warmer. PVC pipe requires slight over bending which will "pop back" a few degrees upon the release of bending pressure.
