**Availability:** CALL**Product Code:** MP155HA248-B**Brand:** ShaxonQty: [Add to cart](#) **Description****Specification****Feature**

Shaxon's 24 port RJ45 to 110 Category 5E patch panel provides an wiring organization point for 24 permanent cabling runs between wiring closet and user outlets. RJ45 jacks on the front commonly connect a switch or router to the panel via patch cables while the corresponding 110 clips on the back are terminated with the permanent cabling runs. Color coded 110 clips make wire termination fast and simple and feature the appropriate color code for either 568A or 568B terminations. The panels come with a lite duty 110 tool for terminating wire and 110 stuffer caps to protect the finished terminations. Category 5E is a high speed networking standard, providing a backbone for transmission speeds up to 1000 Base-T and is backwards compatible with both 10 Base-T and 100 Base-T Product dimensions are: 19"w x 3.5"h (2u) x 2"d. This product features a Lifetime warranty.
