Nice light, short life

March 3, 2014

I was thrilled with this light at first, it's well made, compact, and throws plenty of light. However, after using the flashlight for two months, it's begun to have intermittent operation. At first I thought the batteries were close to dead, but new batteries didn't solve the problem. No amount of fiddling with the battery contact springs has solved the issue. This is precisely why I sought a replacement for the LED MagLite I had...I want a light that will stay on when switched on without having to constantly tap on it to re-establish battery contact. In addition to the electrical issues, the reflective coating on the cone surrounding the LED has begun to flake off and stick to the inside of the lens. I've met people who own this light and love it, and the reviews on this site seem generally positive, so perhaps mine is the exception to the rule, but I'm looking for something different.

Good Light

January 6, 2014

We have purchased many of these lights for our employees to use and the only complaint I have is the switch wears out rather quickly otherwise a good light for the money.

Yes, I recommend this product.

great features

November 23, 2013

This is a great little flashlight for the money. It is light weight and easy to handle. I keep it next to my bed for use at night. I like the beam it throws and how far it shines. lights up all I need to see.

Yes, I recommend this product.

by far a better product than competitors

October 25, 2013

I work with a handful of people that have paid up to \$100 for their flashlight. Rayovac is way better and for a third of the cost. I have bought 5 so far. great gift idea

Yes, I recommend this product.

this is a good light

October 23, 2013

it is my personal opinion that the first stage should be the max output but overall for the cost of this light i am very pleased.

Yes, I recommend this product.

Superb!

October 10, 2013

For the price it can't be beat. Performs just as well as same type unit selling for much more.

Yes, I recommend this product.

Great Flashlight-Top marks

August 13, 2013

I have worked in law enforcement for over twenty years and have used all types and kinds of flashlights. This Rayovac RNT3AAA-B is by far one of the best, if not THE best buy for the money. Pros--Great light--200 lumens and a great throw. Uses AAA batteries rather than the expensive CR-123's, has a very good run time, simple to use tail cap switch. Cons--Takes a bit of practice to cycle through the modes, but that's minor. The scalloped metal on the front and rear really isn't needed. All it does is get bent, when you drop it. Has lanyard hole but no lanyard included. Final rating-5/5

Yes, I recommend this product.

the best in its class. if we take into account the price.

August 13, 2013

the best in its class. if we take into account the price. up until many models but expensive, not worth selling officially in Brazil. I bought one. but if it sells here but certainly buy.

Yes, I recommend this product.
