

## Weatherproof Push Button

### 1785

The 1785 weatherproof push button is constructed of a cast aluminum rim with a composition diaphragm center. The unit is drilled and tapped for 1/2" (13mm) conduit and has a gray aluminum finish. The push button is fitted with two side mounting lugs.

For exterior use. Typical applications include use in push button panels, school signaling, machine start and stop, entrance pushes, and industrial signaling. Also used in the trucking industry and OEMs.
